**SAFETY INFORMATION**

Low Energy Sliding/Fold Over

These minimum safety checks in addition to those in the Owner's Manual should be made each day and after any loss of electrical power.

1. Activate the door. Door should open at a slow smooth pace (4 or more seconds), and stop without impact.

2. Door must remain fully open for a minimum of 5 seconds before beginning to close.

3. Door should close at a slow, smooth pace (6 or more seconds), and stop without impact.

4. Inspect the floor area. It should be clean with no loose parts that might cause user to trip or fall. Keep traffic path clear.

5. Inspect door's overall condition. The appropriate signage should be present and the hardware should be in good condition.

6. Have door inspected by an AAADM certified inspector at least annually.

DO NOT USE DOOR if it fails any of these safety checks or if it malfunctions in any way. Call a qualified service technician to service or repair the door.

See Owner's Manual or Instructions for details on each of these and other safety items. If you need a copy of the manual, contact the manufacturer.
