

January 8, 2021

TO: AAADM Certified Inspectors

SUBJECT: Certification Renewal

All AAADM Certified Inspectors must renew certification status annually. This helps us maintain a current database and ensures that we are able to reach current certified inspectors. Normally, this process must be completed by January 31 in order for inspectors to maintain their certification status.

We are developing an online registration system for new inspectors and existing inspectors. This system will allow individuals to access and manage their own registrations and renewals. Registered users will be able to print their own diplomas and ID cards, update contact information, receive automated reminders of renewal deadlines, etc.

We expected this system to be complete late last year; however, there have been unexpected delays, some due to illness with developers. As a result, the system will not be complete until the end of the month. **The expiration date for all inspectors required to renew by January 31, 2021 is extended until March 31, 2021.**

Two new standards have been released since the last renewal period. All renewing inspectors will receive copies of these standards:

- ANSI / BHMA A156.19-2019, Power Assist and Low Energy Power Operated Doors
- ANSI / BHMA A156.38-2019, American National Standard for Low Energy Power Operated Sliding and Folding Doors.

To cover the cost of the standards, the renewal fee will be \$95. We will notify all inspectors when the system is complete and will provide instructions on how to register on the system.

Thank you for your continued support and participation. If you have any questions, please contact the AAADM office.

Sincerely,

R. CHRISTOPHER JOHNSON
