Automatic Door Mats

The Safest, Most Reliable Door Activation Method Available

The Larco Top 10:

*The Top 10 Reasons
Presence-Sensing Mats
are Better Than Other
Electronic Sensors*

Larco

An Acrometal Company
ISO 9002 Certified

Automatic Door Mats

The Safest, Most Reliable Door Activation Method Available

10) They're Incredibly Easy to Install!

Presence-sensing mats are a simple mechanism and easy for anyone to understand--unlike sensors, which are complicated electronic devices that require specialized training to understand and install properly. That means you won't need to hire an expensive technician to install, maintain and service your automatic door.

9) Presence-Sensing Mats Welcome Your Customers and Naturally Direct Proper and Safe Traffic Flow

With a wide variety of colors, shapes, sizes and surface styles, presence-sensing mats offer an attractive solution.

Welcome your customers with your company logo or a customized message or match the decor of your facade with colored mats and matching anodized trim. Or add a touch of class to your entrance with bronze-finished trim and guide rails.

ISO 9002 Certified

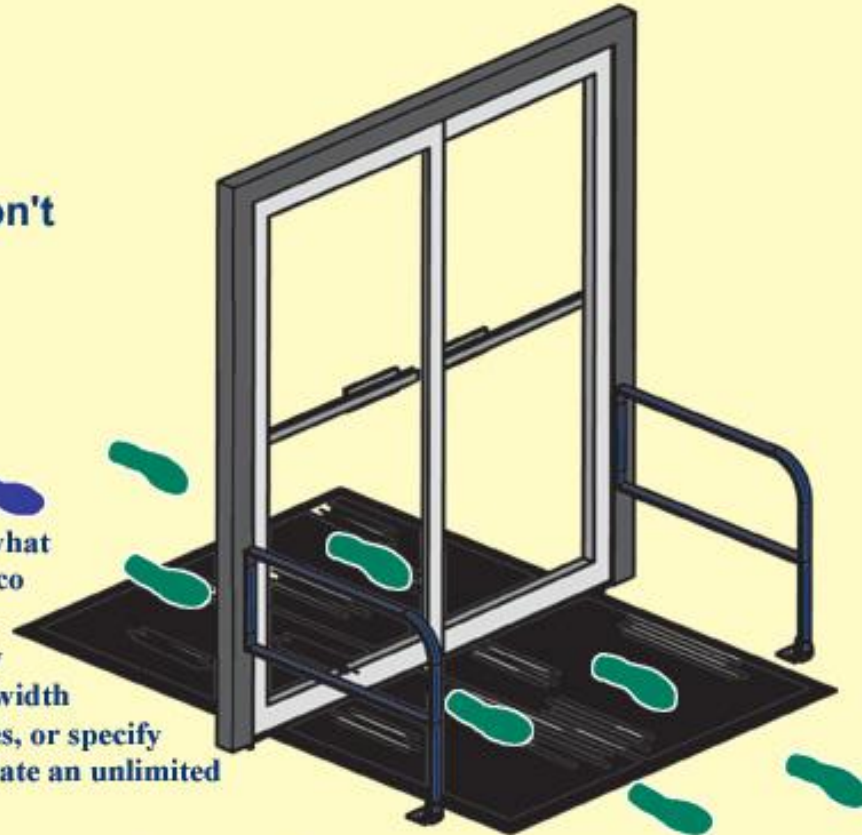

Automatic Door Mats

The Safest, Most Reliable Door Activation Method Available

7) Larco Presence-Sensing Mats Make ANSI and ADA Compliance Easy!

Easy ANSI Compliance

- All pieces necessary for ANSI-compliance under one easy part number, including guide rails for swinging and folding doors!
- Safety zones and active areas are easily defined, unlike other types of sensors that make this process more difficult and much less accurate

Easy ADA Compliance

- 50 million americans are affected by ADA today...and that number is growing!
- Only government buildings are affected today, but regulations will apply to all public buildings in the future

The Safest, Most Reliable Door Activation Method Available

6) We Love Abuse!

Larco presence-sensing mats are designed to stand up to the toughest environmental conditions, including heavy traffic from shopping carts and customers. In fact, Larco presence-sensing mats are often used in industrial environments with high fork lift traffic. Made from rugged materials and designed to take punishment, Larco presence-sensing mats are incredibly impact resistant and can take intermittent loads up to 3,000 psi.

5) Total Reliability!

When you use Larco automatic door mats, your doors will spend more time letting customers in than being serviced. With intense quality control, superior materials and excellent workmanship, Larco mats are designed to function properly, without maintenance and adjustment, for years.

Larco

ISO 9002 Certified

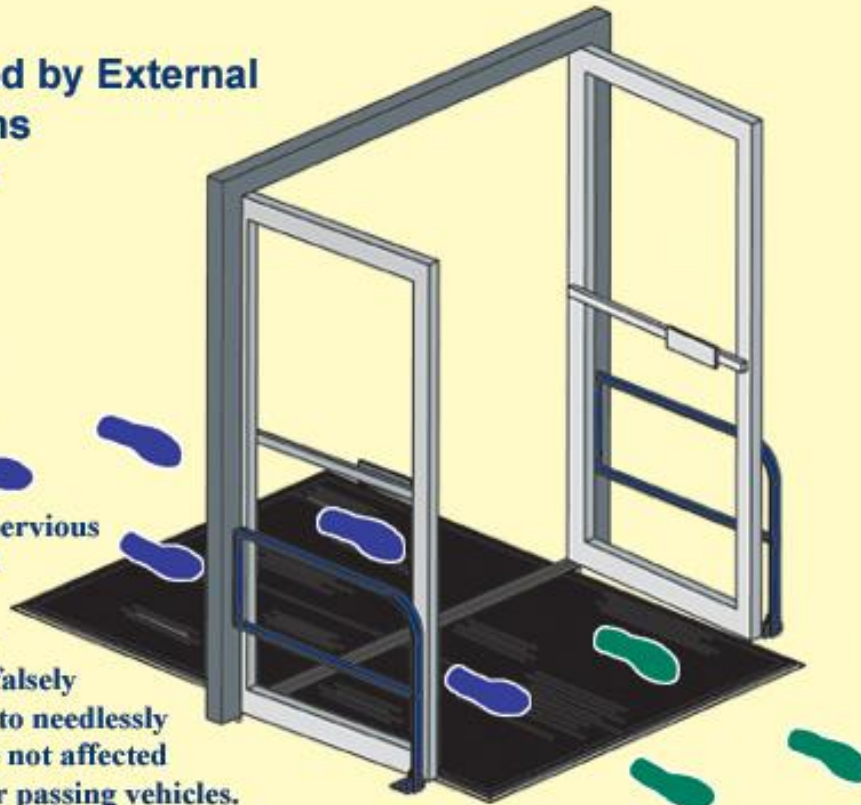

Automatic Door Mats

The Safest, Most Reliable Door Activation Method Available

4) Mats are Unaffected by External Weather Conditions or Blowing Debris

With Larco's totally submersible design, our presence-sensing mats are impervious to rain, snow, sleet and ice and won't be affected by intense sunlight or reflective surfaces. Unlike other sensors that can falsely activate and cause your doors to needlessly open and shut, Larco mats are not affected by passersby blowing debris or passing vehicles.

An Acrometal Company
ISO 9002 Certified

Automatic Door Mats

The Safest, Most Reliable Door Activation Method Available

3) No Maintenance Necessary!

Presence sensing mats are designed for total reliability, which means they won't ever fall out of adjustment. In addition, daily safety checks and adjustments required by other types of sensors aren't necessary with Larco mats, saving you time and money!

Larco

ISO 9002 Certified

Automatic Door Mats

The Safest, Most Reliable Door Activation Method Available

2) Mats are the Safest Method Available

Unlike other types of sensors that must detect motion, Larco presence-sensing mats offer positive control--when a person steps on a presence-sensing mat, they are sensed. No matter how fast they're moving, no matter what they're wearing, no matter their age or disability, presence-sensing mats are designed to detect anyone. This means they won't cause your doors to inadvertently slam shut on someone who pauses in the doorway.

AND THE NUMBER ONE REASON WHY MATS ARE BETTER THAN OTHER ELECTRONIC SENSORS: Presence-Sensing Mats are the Most Cost-Effective Method Available!

With a lower initial cost and lower costs over time, Larco presence-sensing mats offer a more cost-effective solution. Their no-maintenance design reduces the time and money you'll spend maintaining your entrance, and with their total reliability, they won't cause phantom activations that affect your building's climate and raise your energy costs. When it comes to the bottom line, presence-sensing mats are just better for your wallet!

Mats Versus Sensors: Cost Over Time

Here's the comparison over two years' time for a Single Swing Door with one way traffic and mats on both sides of the door... assuming sensors installed function properly and require no adjustments or maintenance.
